FWP

Washer Compactor

A Flexible, Low Profile Screenings Washing and Dewatering System

Two Flo-WashPress units receiving screenings from a conveyor system.

The Flo-WashPress Shafted Washer Compactor incorporates screenings washing and dewatering in a single unit. The clean, dewatered screenings can then be discharged into a dumpster or an optional continuous bagger for ease of handling and disposal.

Features & Benefits

- 1 **Screenings washing** - Removing organics from screenings prior to dewatering produces drier solids.
- 2 **35% to 40% dry solids** - More acceptable to landfill.
- 3 **Clean, dewatered screenings** - Reduced volume and less odor.
- 4 **Less odor** - More neighbor and operator friendly.
- 5 **75% volume reduction** - Reduced handling and disposal costs.
- 6 **Compact, low profile design** - Easily retrofitted into existing installations or integrated into new equipment layouts.

As with all products in the Enviro-Care Flo-Products family, the Flo-WashPress keeps mechanical complexity to a minimum. With its low maintenance, single auger screw design and its efficient drive system, the Flo-WashPress Shafted Washer Compactor significantly reduces maintenance requirements and downtime.

FLO-Products

Simply Superior Design

Enviro-Care has been manufacturing liquid/solid separation and solids reduction technology for the wastewater industry since 1972. These unique products are engineered for high process efficiency, reduced maintenance and low energy consumption.

With the addition of new screens, MBR Pre-treatment systems, washing/dewatering options, and complete sludge/septage screening systems; Enviro-Care products can be found providing the same exceptional quality and cost-effective technology in more wastewater applications than ever before.
